- Reducing database query time by 60%.

Projects

WHERE IN THE WORLD?

- I developed a fully responsive Single Page Application (SPA) that integrates country data.
- I utilized the following technologies: Figma, HTML, CSS, JavaScript, React, and GitHub.
- I Implemented light and dark modes for a customizable user experience and a 404-error page to enhance usability.
- I included search and region-filtering features for easy access to country information.
- Project available [here](#).

ALURAFIX

- I developed a single-page website (SPA) that allowed users to store YouTube videos of their interest. It also included functionality to create categories, assign videos to categories, and offered basic editing and deletion options.
- I used the following technologies: Figma, HTML, CSS, JavaScript, React, and GitHub.
- The project successfully enabled the creation, editing, and deletion of categories and videos. Furthermore, it was fully responsive, ensuring a seamless user experience on different devices.
- Project available [here](#).
